Summary

I'm a responsible and autonomous Full-Stack Web Developer and SEO Specialist. I research competitors' market needs and build responsive, interactive websites or landing pages with features like Google Maps, Analytics, and Stripe payments. I use Next.js for efficient development and optimize sites with comprehensive SEO strategies, from keyword research to technical SEO. My goal is to boost business profits by enhancing online visibility and performance.

Work Experience

Freelance Web Developer
December 2021 - present

- Built responsive and interactive landing pages and websites for local businesses.
- Integrated custom features such as Google Maps, Google Analytics, and Stripe payments.
- Delivered high-quality, user-friendly websites tailored to the specific needs of each client.

Electrician at Marcon Automation, Robotica & Control
June 2019 - Februar 2020

- Programmed and configured controllers, including PLC systems from Delta, Siemens, and Unitronics, as well as industrial robots such as packing robots.
- Developed and implemented high-tech control panel wiring tailored to the needs of sectors like food processing, military, and aviation manufacturing.
- Installed and connected digital and analog sensors for advanced industrial automation systems.

WordPress Developer and SEO Specialist at PixelPro SEO
October 2016 - January 2019

- Built makeup blogs and eCommerce stores, integrating WooCommerce and payment methods such as Stripe.
- Optimized websites for search engines using plugins like Yoast SEO, Jetpack, and All in One SEO, and promoted them via Facebook groups, Instagram profiles, and SEO.
- Created advertising banners and logos using Adobe Photoshop and Adobe Illustrator.

Professional Development
